CRP portfolio location

Snap shot af de nordiske ejendomsmarkeder

Hvad karakteriserer det danske ejendomsmarked?

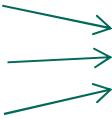

- Relativt lille marked
- DKK er en marginal valuta - trods tæt tilknytning til EUR
- Lav transparens – i både priser og processer
- Domineret af institutionelle og lokale investorer
- Få direkte udenlandske investorer
- Meget få børsnoterede ejendomsselskaber = manglende information
- Begrænset tilgængelig data. Validitet? Ex. IPD: 20% eksterne vurderinger
- I en nordisk allokering bliver DK oftest residualen
- Voldsomt omfang af ejendomsrelaterede kollaps. Hvad sker der?!

Men vi har også....

- København som en stærk og attraktiv metropol
- Stærke juridiske og sikkerhedsmæssige rammebetingelser (JLL: Global #1)
- Lave direkte transaktionsomkostninger
- Lav valuta risiko
- Relativt stabilt lejemarked gennem cykler - God stabiliserende porteføljeeffekt
- Prime kontorlejer blandt det laveste i Europa - Begrænset downside ?
- ”Verdens bedste realkreditsystem” - Husk passivsiden når man taler om dyrt eller billigt...

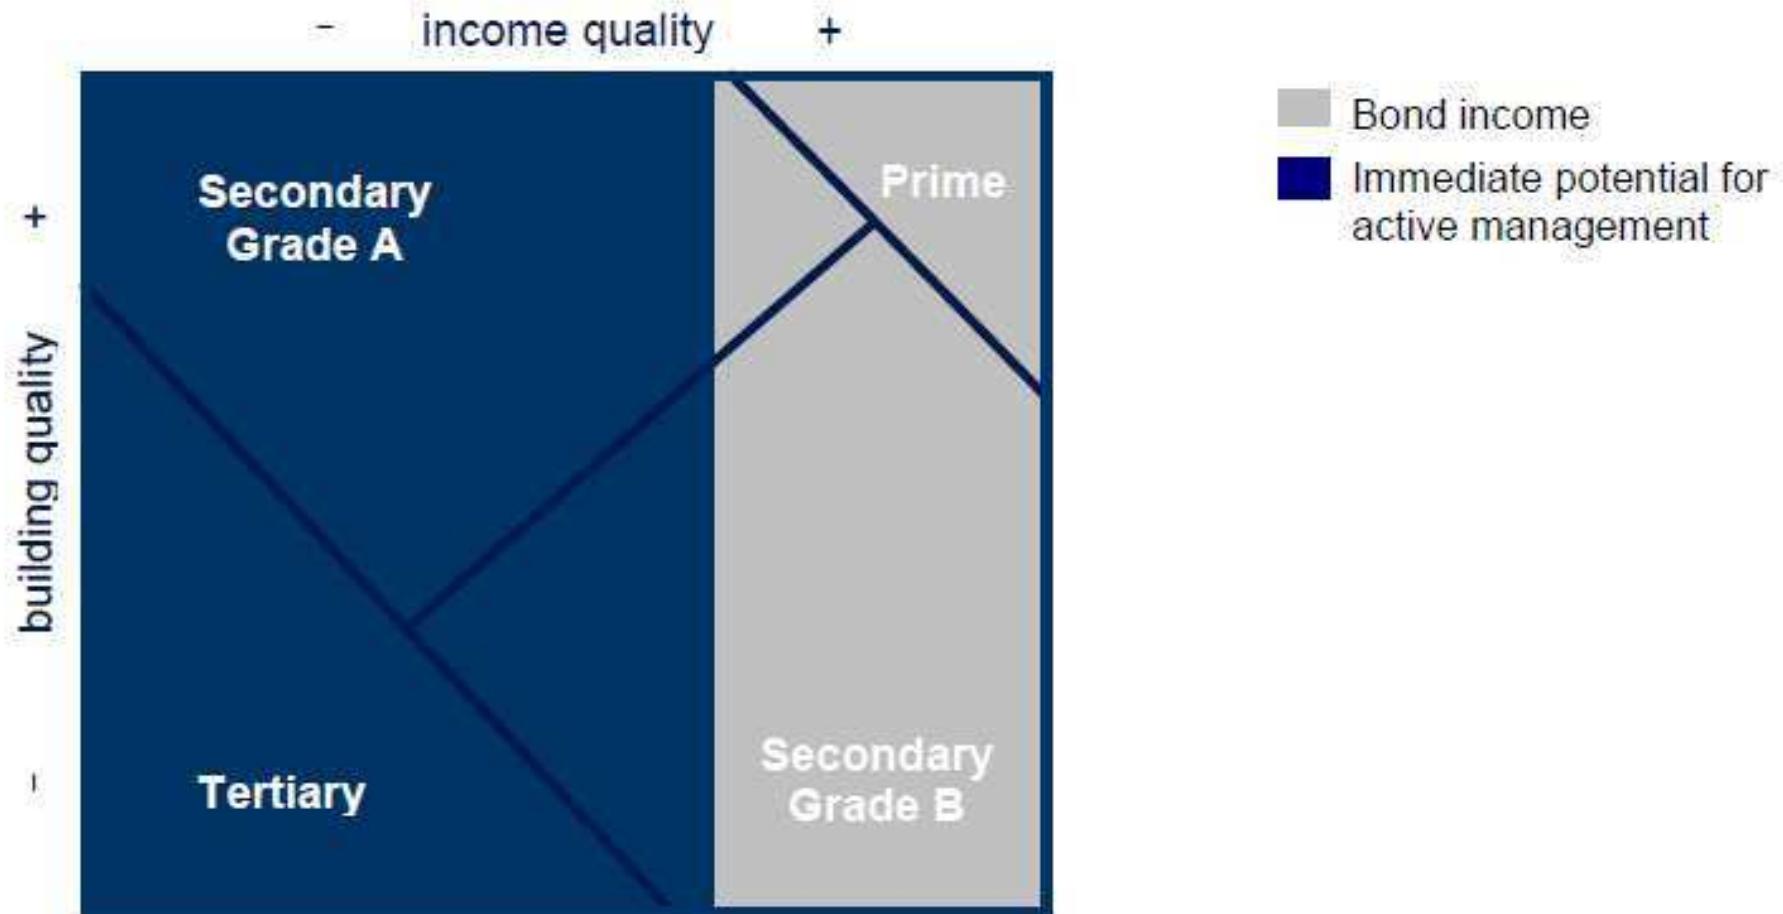

Hvilke motiver har Niam for etablering?

- Investeringsplatform = Norden
 - Lokal repræsentation et ubetinget krav
 - Fri allokering mellem investeringsmuligheder i SV, NO, SF og DK
 - Fokus på den enkelte case! Ingen markeds vægtning og index tracking
 - Slank forretningsmodel og tålmodighed. Mulighed for og råd til ”ikke at gøre noget”.
- Lav transparens skaber barrierer
 - Problem når du er udenfor – fordel når du er indenfor
- Timing er afgørende
 - Forsinket markedsdynamik (lack effekt) I forhold til øvrige nordiske markeder?
 - Svage konjunkturer og negativ stemning
 - Pressede ejere
 - Pressede finansieringskilder (Banker)

*Opbrud og strukturelle
forandringer i markedet*
- Attraktive muligheder for den agile investor med kapital

Hvilke muligheder ser Niam?

- Opportunistisk vindue
 - Relativt begrænset konkurrence på store aktiver udenfor rent core/core+ segment
 - Køber-sælger ubalance kan i nogle segmenter føre til attraktive muligheder og merafkast
 - Geografi: Primært Storkøbenhavn (men potentielt endnu større *bargaining power* på volumen i provinsen)
- Fokus på substansværdi: Pris < cost ?
- Fokus på drift: Hvor skal værdien komme fra? Hvem skal leje det?
 - Indtægter = (Kendt cash flow x (1- risiko)) + (potentiale x sandsynlighed)
- Fokus på Exit: Hvem skal eje det efter os?
 - Exit scenarier på 5-7 årig horisont er en integreret del af investeringsbeslutning
- Finansiering
 - Strammere betingelser men også konkurrence om gode låntagere med ”navn” og track record
 - Accepterer ikke parkeringsordninger men kan tilbyde finansiering til god debitor med reel ny egenkapital
 - Realkredit!
- Bemærk: Opportuniske penge er ikke *risikosøgende* penge men *afkastsøgende* penge

Metro expansion is a driver of development dynamics

Green = existing lines

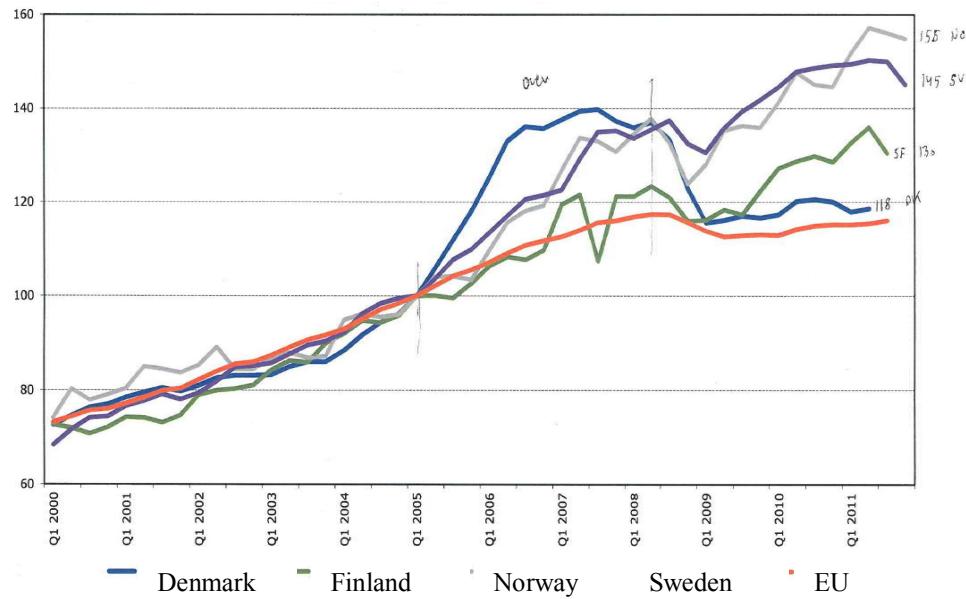

Blue = under construction

Yellow = in planning

Why residential in Copenhagen?

- Acquisition price close to replacement cost
- Population growth leads to higher rents or higher prices
- Built-in hedge: Preference for renting in bad times and buying in good times
- Yield gap. Mortgage financing delivers strong leveraged IRR
- Multiple exit opportunities

Take away

- Tænk:
 - Hvad er det for en slags penge?
 - Hvad er det for en forretningsmodel?
 - Hvad er vigtigt for denne investor? (sikkerhed, hastighed, placering, volumen osv.)
 - Hvad er det for en organisation?
 - Hvor lang er investeringshorisonten?
 - Hvor ligger beslutnings- og bevillingskompetencen?
- Hvad er denne investors *edge* (styrker og svagheder)?
 - Kapital
 - Indkøb?
 - Drift?
 - Udvikling?
 - Leader eller follower?
 - ”Niche butik ” eller ”grossist?”
- Der er ingen rigtige eller forkerte forretningsmodeller og strategier – kun forskelligeog forskellige rådgivningsbehov
